I am writing to request that you do nothing to halt the sales of hearing aides by mail order. This is an important alternative-medical source for many Americans who either cannot, or by choice, do not wish to be treated by audiologists. Ordering hearing aides by mail is a part of our right to choose medical care. Please do not give in to lobbyists who are motivated by their own monetary gain. Help us maintain our independence and right to choose.

Yours truly,

Robert S. Carter
